Portfolio: <https://animated-port-folio-chi.vercel.app>

PROFESSIONAL SUMMARY

Software Engineer Intern with hands-on experience building production-grade full-stack applications using React.js, TypeScript, Node.js, and NestJS. Skilled in designing scalable REST APIs, relational database schemas with PostgreSQL and TypeORM, and authentication/authorization systems. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and clean, maintainable software architecture.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, C, Python

Frontend: React.js, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Responsive Design, Component Architecture, State Management

Backend: Node.js, NestJS, REST API Design, Authentication, Authorization (JWT, RBAC), Socket.io

Database: PostgreSQL, MongoDB, TypeORM, Database Design

Tools & Practices: Git, GitHub, VS Code, Docker, Redis, SOLID Principles, Clean Architecture, Data Structures and Algorithms, Debugging

PROFESSIONAL EXPERIENCE

Krumos Tech LLP — Software Engineer Intern

Mar 2026 – Present

- Developed multi-tenant real-time project management application (Krumos PM) using NestJS, TypeScript, PostgreSQL, Redis, and Socket.io, with isolated workspace-based tenant architecture.
- Implemented authentication and authorization using JWT, Google OAuth 2.0, and Passport.js, with role-based access control (RBAC) across ADMIN, MANAGER, and MEMBER roles.
- Designed relational database schema and data models with PostgreSQL and TypeORM, ensuring referential integrity and efficient querying across multi-tenant data.
- Built real-time collaboration features using Socket.io and engineered responsive frontend components, including a workspace selector, using React.js and Tailwind CSS.
- Containerized backend services with Docker Compose and optimized performance through Redis caching and efficient frontend state management.

PROJECTS

Project Management — Multi-Tenant Project Management Tool

- Architected a multi-tenant backend with NestJS, TypeScript, PostgreSQL, and TypeORM, including JWT/OAuth authentication, RBAC, and Socket.io-based real-time updates.

Production-Ready Todo API

- Built a RESTful Todo Management API using NestJS, PostgreSQL, and TypeORM with JWT authentication, DTO-based validation, and modular clean architecture.

IronLog — Fitness and Diet Tracking App

- Developed a fitness and diet tracking app using React and TypeScript with workout logging, BMI calculation, reusable type-safe components, and progress tracking.

Employee Management System

- Built a web application for managing employee records using React, TypeScript, and REST API integration, with dynamic search, filtering, and component-based architecture.

Bike Price Prediction

- Developed a Linear Regression model using Python to predict bike prices, with an interactive Streamlit web interface for real-time predictions.

EDUCATION

B.Tech in Computer Science (AI)

Expected 2027

Shri Shankaracharya Institute of Professional Management and Technology, Raipur (CSVTU)

- Relevant Coursework: Data Structures and Algorithms, Full-Stack Web Development, Machine Learning, Object-Oriented Programming.

Higher Secondary (12th), Deshbandhu English Medium Higher Secondary School, Raipur 2023
